

There's Stock Picking. There's Indexing. Then There's Dimensional Investing.

STOCK PICKERS

Try to outguess the market by finding pricing "mistakes."

There are many types of investing, from active methods that seek to outguess the market to passive approaches that try to track market indices. Dimensional Investing is different.

- Stock pickers and market timers look for what they believe are pricing mistakes, making bets on what they think the stock market has missed. But research shows little evidence of any consistent success with these traditional active investing approaches.
- Indexers rely on index providers to tell them what to hold and when to buy and sell, which can result in lower returns and higher trading costs. Long periods between index rebalancing can also lead to style drift—holding assets that don't align with an index's targeted asset class.
- Dimensional draws on insights from financial science and our internal research team to emphasize areas of the market that have higher expected returns. Then we seek to add value through daily implementation, using a systematic yet flexible approach to buy and sell securities.

INDEXERS

Seek market returns by tracking an index.

DIMENSIONAL

Trust the market. Use information in market prices and a systematic approach to target higher expected returns.

Dimensional isn't held back by the constraints of index investing, but we take a more systematic approach than active stock picking. That's how we aim to deliver better outcomes for investors.

Investments involve risks. The investment return and principal value of an investment may fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original value. Past performance is not a guarantee of future results. There is no guarantee strategies will be successful.

"Dimensional" refers to the Dimensional separate but affiliated entities generally, rather than to one particular entity. These entities are Dimensional Fund Advisors LP, Dimensional Fund Advisors Ltd., Dimensional Ireland Limited, DFA Australia Limited, Dimensional Fund Advisors Canada ULC, Dimensional Fund Advisors Pte. Ltd., Dimensional Japan Ltd., and Dimensional Hong Kong Limited. Dimensional Hong Kong Limited is licensed by the Securities and Futures Commission to conduct Type 1 (dealing in securities) regulated activities only and does not provide asset management services.

UNITED STATES

This material is not intended for Quebec residents.

Commissions, trailing commissions, management fees, and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. Unless otherwise noted, any indicated total rates of return reflect the historical annual compounded total returns, including changes in share or unit value and reinvestment of all dividends or other distributions, and do not take into account sales, redemption, distribution, or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently, and past performance may not be repeated.
