Weighted average fees are calculated by taking the Model weights and underlying fund net expense ratios as published in the most recent prospectus to calculate the model weighted average fee. If a model has a cash component, the fee for that portion of the model is assumed to be 0%. Advisory fees that may be applicable in the management of the Model are not reflected.

Fees shown are as of the most recent prospectus. Certain underlying Dimensional funds have entered into fee waiver and/or expense assumption arrangements with Dimensional. In these cases, Dimensional has contractually agreed, under certain circumstances, to waive certain fees and/or assume certain expenses of the Portfolio. Unless otherwise stated in the prospectus, the fee waiver and/or expense assumption agreement will remain in effect for one year from the date of the prospectus and continue in effect from year to year thereafter unless terminated by a Portfolio or the Advisor. The net expense ratio reflects the total annual fund operating expenses of the Portfolio after taking into account any such fee waiver and/or expense assumption arrangements. Please read the Portfolio's prospectus (available in the Fund Center on my.dimensional.com) for details and more information.

In the US, Large Cap is defined as approximately the largest 70% of market capitalization, Mid Cap the next 20%, and Small Cap the smallest 10%. In developed markets except the US, Large Cap is defined as approximately the largest 70% of market capitalization in each country or region, Mid Cap the next 17.5%, and Small Cap the smallest 12.5%. In emerging markets, Large Cap is defined as approximately the largest 70% of market capitalization in each country or region, Mid Cap the next 15%, and Small Cap the smallest 15%. Designations between value and growth are based on price to book ratios. Value is defined as the 50% of market cap with the lowest price to book ratios by size category and growth is the highest 50%. Profitability is measured as operating income before depreciation and amortization minus interest expense scaled by book. High profitability is defined as the 50% of market cap with the highest profitability by size category and low profitability is the lowest 50%. REITs, Utilities, and Other Stocks includes REITs and Utilities, identified by GICS code, and stocks without size, relative price, or profitability metrics. Weights may not total 100% due to rounding. GICS was developed by and is the exclusive property of MSCI and S&P Dow Jones Indices LLC, a division of S&P Global.

Credit rating agencies Moody's Investor Service, Fitch Ratings, and Standard & Poor's Corporation rate the credit quality of debt issues. For reporting purposes, Dimensional generally assigns a composite rating based on stated ratings from Nationally Recognized Statistical Ratings Organizations ("NRSROs"). For example, if Moody's, Fitch, and S&P all provide ratings, Dimensional assigns the median rating. In certain instances, such as Pre-Refunded Municipals and US Treasury and Agency securities, Dimensional will assign the internal Dimensional rating. The internal Dimensional rating can only be as high as the highest stated credit rating from an NRSRO.

Prior to listing date, the following ETFs operated as mutual funds: US Core Equity 2 ETF (listing date: June 14, 2021) The NAVs of the predecessor mutual funds are used to compute performance from inception to listing. For ETFs, the market price return is calculated from closing prices as determined by the fund's listing exchange. If you trade your shares at another time, your return may differ. For the period from inception date to listing date, the NAV of each fund is used as a proxy for the market price to calculate returns. ETFs trade like stocks, fluctuate in market value and may trade either at a premium or discount to their net asset value. ETF shares trade at market price and are not individually redeemable with the issuing fund, other than in large share amounts called creation units. ETFs are subject to risk similar to those of stocks, including those regarding short-selling and margin account maintenance. Brokerage commissions and expenses will reduce returns.

COMPONENT AFTER TAX RETURNS AS OF 06/30/2025

	ANNUALIZED RETURNS			
	1 Year	5 Years	10 Years	Since Inception
US Core Equity 2 ETF	12.43%	15.95%	11.41%	9.42% 10/04/2007
After taxes on distributions	12.03%	15.59%	10.94%	8.99% 10/04/2007
After taxes on distributions and sale of portfolio shares	7.45%	12.81%	9.32%	7.90% 10/04/2007
Russell 3000 Index	15.30%	15.96%	12.96%	10.06% 10/04/2007

After-tax returns are calculated using the highest individual federal income tax rate in effect and they do not reflect state and local taxes. After-tax returns depend on an investor's particular tax situation and may differ from those shown here.Prior to listing date, the following ETFs operated as mutual funds: US Core Equity 2 ETF (listing date: June 14, 2021) The NAVs of the predecessor mutual fund are used for performance from inception to listing.

Ten year standard deviation measures the variability of monthly returns over the preceding 120 months. It is used to quantify historical return volatility.

Performance data shown represents past performance and is no guarantee of future results. Current performance may be higher or lower than the performance shown. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. To obtain the most current month-end performance data for Dimensional Funds, visit us.dimensional.com. Performance includes reinvestment of dividends and other earnings. Returns for periods shorter than one year are not annualized.

Fees shown are as of the most recent prospectus. Certain Portfolios have entered into fee waiver and/or expense assumption arrangements with the Advisor. In these cases, the Advisor has contractually agreed, under certain circumstances, to waive certain fees and/or assume certain expenses of the Portfolio. Unless otherwise stated in the prospectus, the Advisor may amend or discontinue these arrangements at any time, one year from the date of the prospectus. The net expense ratio reflects the total annual fund operating expenses of the Portfolio after taking into account any such fee waiver and/or expense assumption arrangements. Please read the Portfolio's prospectus for details and more information.

IMPORTANT INFORMATION

Dimensional data provided by Dimensional.

Risks include loss of principal and fluctuating value. Investment value will fluctuate, and shares, when redeemed, may be worth more or less than original cost.
Small and micro cap securities are subject to greater volatility than those in other asset categories.
International and emerging markets investing involves special risks, such as currency fluctuation and political instability. Investing in emerging markets may accentuate these risks.
Sector-specific investments focus on a specific segment of the market, which can increase investment risks.
Fixed income securities are subject to increased loss of principal during periods of rising interest rates. Fixed income investments are subject to various other risks, including changes in credit quality, liquidity, prepayments, call risk, and other factors. Municipal securities are subject to the risks of adverse economic and regulatory changes in their issuing states.
Real estate investment risks include changes in real estate values and property taxes, interest rates, cash flow of underlying real estate assets, supply and demand, and the management skill and creditworthiness of the issuer.
Sustainability and social funds use environmental and social screens that may limit investment opportunities for the fund.
Commodities include increased risks, such as political, economic, and currency instability, and may not be suitable for all investors. The portfolio may be more volatile than a diversified fund because the portfolio invests in a smaller number of issuers and commodity sectors.

Asset Allocation: Overall equity and fixed income allocations are determined by the model's fund level allocation. Regional breakouts within equity are determined by the underlying securities' country assignments made by Dimensional and Dimensional's country to region assignments.

Profitability is measured as operating income before depreciation and amortization minus interest expense, scaled by book.

Indices are not available for direct investment; therefore, their performance does not reflect the expenses associated with the management of an actual portfolio.

The fund prospectuses contain more information about investment risks.

Consider the investment objectives, risks, and charges and expenses of the Dimensional funds carefully before investing. For this and other information about the Dimensional funds, please read the prospectus carefully before investing. Prospectuses are available by calling Dimensional Fund Advisors collect at (512) 306-7400 or at us.dimensional.com. Dimensional funds are distributed by DFA Securities LLC.

Dimensional Fund Advisors LP is an investment advisor registered with the Securities and Exchange Commission.

The funds are actively managed and not managed in reference to a benchmark. The risk factors, benefits and disadvantages of the funds may vary greatly and should be considered alongside portfolio characteristics, holdings and past performance figures stated.

Results and data for the Models are based on current Dimensional Fund allocations, rebalanced monthly at specified weights. Holdings, expense ratios and investment results are calculated using the month end weighted average of the Dimensional Funds. The underlying funds are managed, so holdings of each underlying fund are subject to change.

Dimensional makes available certain model portfolios ("Dimensional Models"). The Dimensional Models are provided "as is." Dimensional has no obligation to continue to maintain or take any other action with respect to the Dimensional Models and may stop providing any update of (and may cease to take any action with respect to) the Dimensional Models at any time in its sole and absolute discretion. Dimensional is not responsible for models constructed by a user of the Tool ("User-Constructed Models") or any modifications to the Dimensional Models made by a user of the Tool (the Dimensional Models and the User-Constructed Models, and any user modifications thereto, collectively, the "Models"). Dimensional is not responsible for implementing the Dimensional Models (e.g., selecting broker-dealers, executing trades or seeking best execution).

The Dimensional Models are provided for informational purposes only and should not be considered investment advice, a recommendation, or an offering of any services or products for sale. The Dimensional Models are not intended as a sufficient basis on which to make an investment decision. Certain investments included in the Dimensional Models may not be suitable for investors, nor do they represent a complete investment program.

Any indices shown are intended for comparative purposes only and may differ significantly from the Dimensional Models. Dimensional makes no representations as to the appropriateness of any of the indices in comparison to the Dimensional Models. The risk factors, benefits and disadvantages of the indices and Dimensional Models may vary greatly and should be considered alongside fund characteristics, holdings and past performance figures stated. Although the Dimensional Models were created using information developed internally and/or obtained from sources believed to be reliable, Dimensional does not guarantee the accuracy, adequacy or completeness of such information.

The Dimensional research and portfolio management teams (the "Model Team") developed the Dimensional Models for launch on 3/31/2020. The Model Team, with oversight from Dimensional's Investment Committee, generally expects to select funds for the Models managed by Dimensional ("Dimensional Funds") without considering the universe of funds sponsored by persons not affiliated with Dimensional or its affiliates ("Third Party Funds"), even though there may or may not be Third Party Funds that may be more appropriate for inclusion in such Dimensional Models. To the extent a user implements all or part of a Dimensional Model, this will generate advisory and other fees for Dimensional or its affiliate, and the management fees of Dimensional funds may be higher than fees charged by Third Party Funds. The Dimensional Models asset allocation represent the selected target asset mix as determined by the Model Team and as of the date it is provided.

Use of the Dimensional Models by a user does not imply that Dimensional has provided any legal, tax or accounting advice or recommendations in relation to the Dimensional Models or advice on whether it would be advisable for any institutional investor, registered investment advisor ("Advisor") or client of the Advisor to invest in any Dimensional Model or Dimensional Funds. The Dimensional Funds selected for a Dimensional Model may not perform as well as and may be subject to higher fees and expenses than other investment products that could have been selected for such Dimensional Model, including potentially Third-Party Funds. Users of the Dimensional Models shall be responsible for independently determining the appropriateness of a Dimensional Model and any Dimensional Funds for such user or its clients. Institutional investors and Advisors shall be responsible for rebalancing portfolios for themselves or their clients.

Dimensional is providing information in the form of Dimensional Models as ideas for possible construction of portfolios centered around the Dimensional Funds and not as investment advice or research. Dimensional is not providing any investment, tax or financial advice to any institutional investor, Advisor or any client of the Advisor, and has no obligation to, and will not take into account the tax status, investment goals or other characteristics of any Advisor or any client of the Advisor when compiling the Dimensional Models. Dimensional is not acting as a fiduciary to any institutional investor, Advisor or any client of the Advisor, nor is any institutional investor, Advisor or any client of the Advisor entering into any type of advisory or other relationship with Dimensional. The investment decisions made by any institutional investor, Advisor or any client of the Advisor based on the Dimensional Models provided shall be at the institutional investor's, Advisor's or such client's own risk and Dimensional makes no guarantee as to the merits of any Dimensional Model or Dimensional Funds selected for a Dimensional Model.

To the fullest extent permitted by applicable law, Dimensional shall have no liability, including with the respect to the accuracy of any data, to the institutional investor, Advisor or any client of the Advisor in relation to the Models.

This material is provided for informational purposes only and should not be considered investment advice, a recommendation, or an offering of any services or products for sale. This material and the Tool used to create this material is not intended as a sufficient basis on which to make an investment decision.

The information herein does not constitute a recommendation from Dimensional Fund Advisors LP. The risk of the Dimensional Models is subject to the risk of the Dimensional Funds, which can be found in the applicable prospectus, and the selection of Dimensional Funds and the allocation and reallocation of Model assets may not produce a desired result.
