GLOSSARY

Diversification: Holding many securities or types of investments in a portfolio, often for the purpose of mitigating risk associated with owning a single security or type of investment.

Expected Return: the percentage increase in value a person may anticipate from an investment based on the level of risk associated with the investment, calculated as the mean value of the probability distribution of possible returns.

Small cap: Refers to stocks with a relatively small market capitalization.

Value stock: A stock trading at a low price relative to measures of economic value, such as book value or earnings.

DISCLOSURES

This information is provided for registered investment advisors and institutional investors and is not intended for public use.

Indices are not available for direct investment. There is no guarantee of index success. The S&P 500 index is a market-capitalization-weighted index that measures the performance of large cap equity securities in the US market. The index comprises 500 leading large cap companies. © 2026 S&P Dow Jones Indices LLC, a division of S&P Global. All rights reserved.

Risks: Risks include loss of principal and fluctuating value. Small cap securities are subject to greater volatility than those in other asset categories. Value indices are subject to risk, which may cause underperformance compared to other equity indices.
