Four Decades of Adding Value in Micro Caps

US Micro Cap Portfolio

Fund Summary as of March 31, 2026

AT A GLANCE

US micro cap equity solution targeting higher expected returns

FUND FACTS

Ticker	Inception
DFSCX	12/23/1981
Gross Expense Ratio	Net Expense Ratio
0.42%	0.41%
Fund Net Assets	
\$6.8B	
Benchmark	
Russell 2000 Index	

WHY DFSCX?

Consistent, Value-Added Exposure

Uses reliable information in prices to target higher expected returns within micro cap stocks

Flexible Implementation

A daily flexible process allows us to maintain consistent emphasis on higher expected return securities through time

Competitively Priced

Priced within the lowest quartile of Morningstar category peers¹

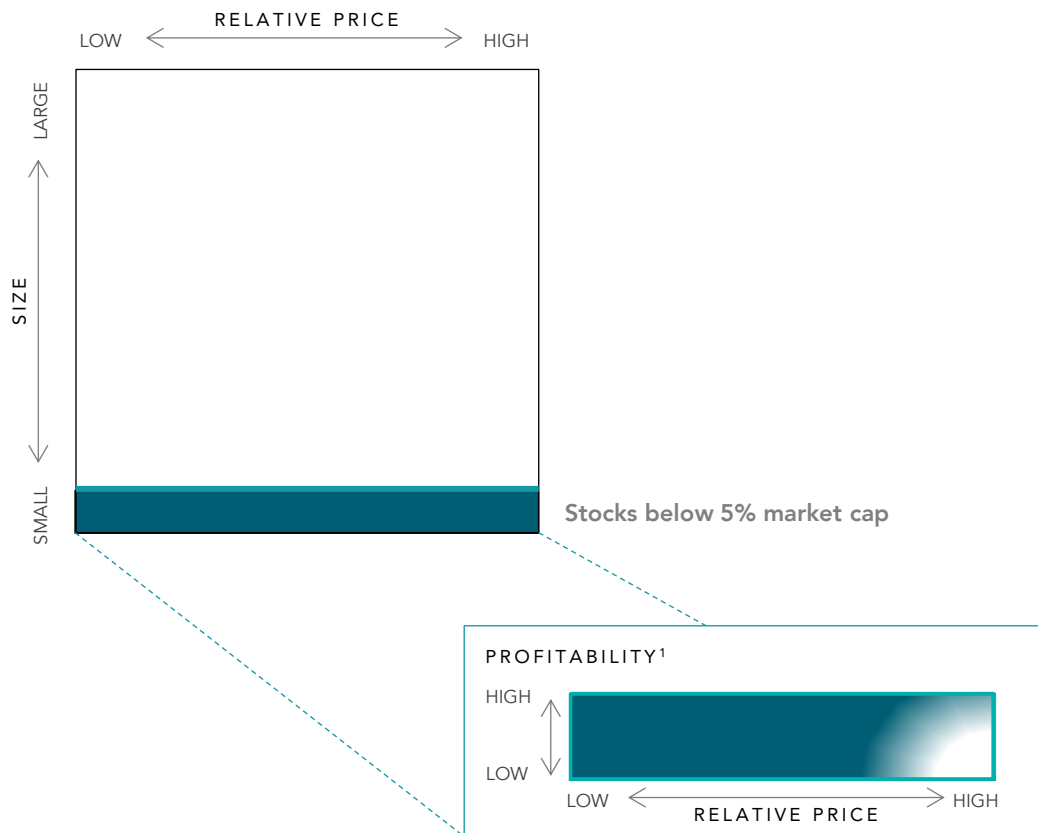

1. Comparison against funds in its Morningstar peer category as of April 1, 2026.

Fund Net Assets in USD

Fee and expense information as of the prospectus dated February 28, 2026. The Portfolio has entered into fee waiver and/or expense assumption arrangements with the advisor. In these cases, the advisor has contractually agreed, under certain circumstances, to waive certain fees and/or assume certain expenses of the class of the Portfolio. The fee waiver will remain in effect through February 28, 2027, and may only be terminated by the Portfolio's Board of Directors/Trustees prior to that date. The net expense ratio of the class reflects the gross expense ratio of such class of the Portfolio after taking into account any such fee waiver and/or expense assumption arrangements. The gross expense ratio reflects the Total Annual Fund Operating Expenses as disclosed in the prospectus. Please read the Portfolio's prospectus for details and more information.

What the Portfolio Can Buy

US Micro Cap Portfolio as of March 31, 2026

ELIGIBILITY AND WEIGHTING GUIDELINES

Eligible Markets	United States
Security Selection	<p>Micro cap stocks:</p> <ul style="list-style-type: none"> – smallest 5% of stocks by market cap down to \$10 million <p>Within micro caps, exclude stocks with:</p> <ul style="list-style-type: none"> – low profitability¹ and high relative prices – high asset growth
Refinements	Exclude REIT securities
Concentration Controls	Target broad coverage of eligible securities to achieve diversification across names and sectors

1. Profitability is measured as operating income before depreciation and amortization minus interest expense scaled by book.

Not comprehensive. Portfolio is governed by the prospectus. The criteria the advisor uses for assessing securities on company size, relative price, profitability, or asset growth are subject to change from time to time.

Dimensional US Micro Cap Portfolio

Growth of \$1, January 1, 1982– March 31, 2026

Four decades of innovation helping to deliver a better investor experience.

Innovation is not just about the next big thing. It's also about doing the little things better, year after year.

- 1981 Dimensional founded
Dimensional US Micro Cap Portfolio launched
- 1984 Russell 2000 Index is created
- 2001 Percentage of market cap breaks
- 2005 Momentum
- 2010 Small growth low profitability exclusion

- 2019 Small high asset growth exclusion
- 2023 In-kind rebalance trades
- 2024 Short-run reversal
Momentum screens enhanced
- ▶ 2026 Dimensional launches first active ETF share class on Dimensional US Micro Cap Portfolio

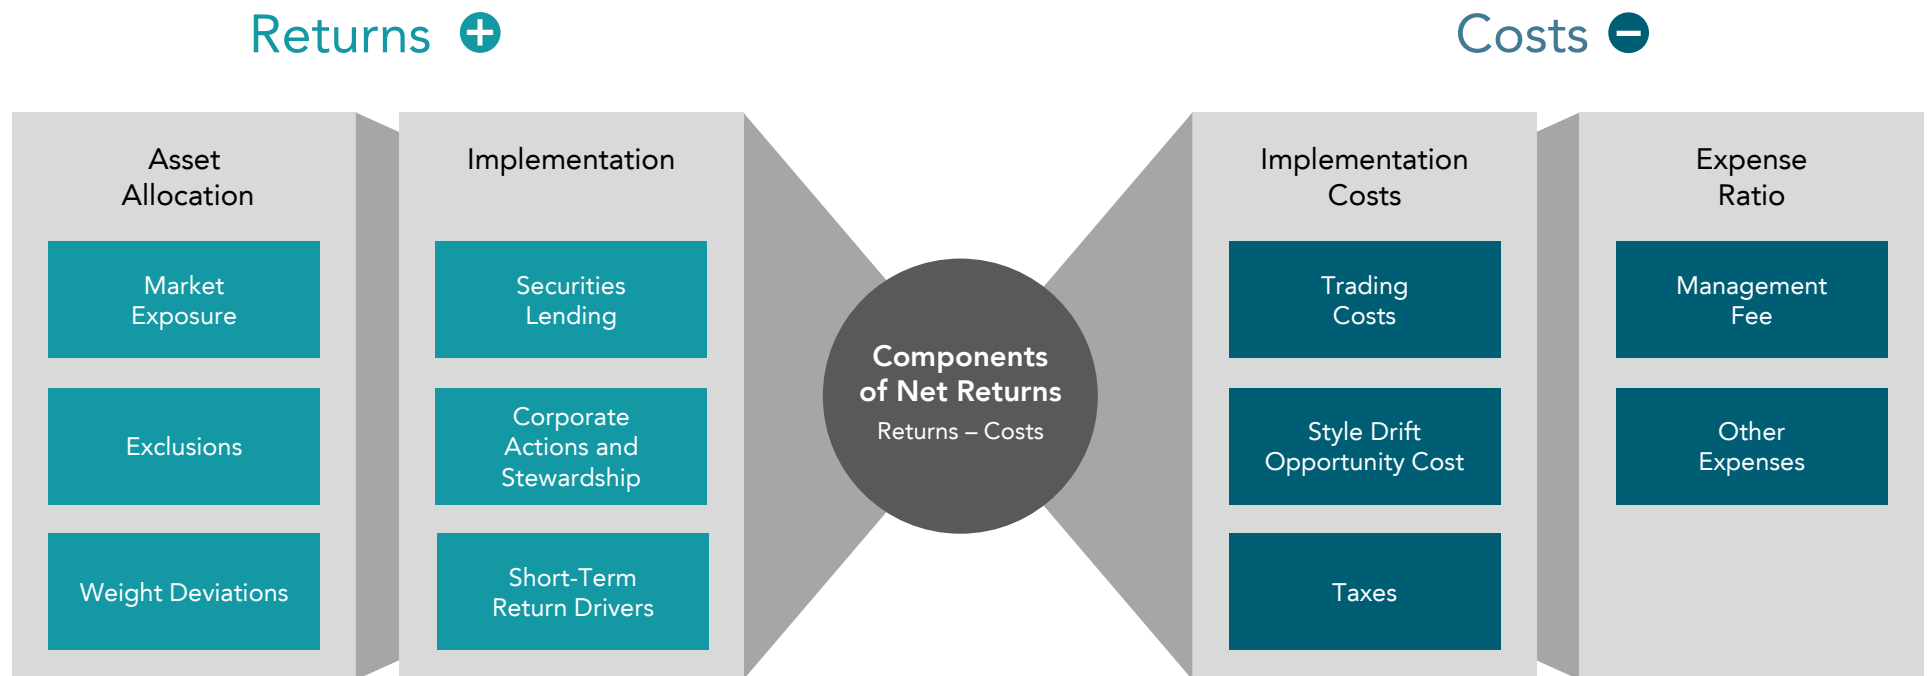

In USD. Growth of wealth chart shows the growth of a hypothetical investment of \$1 and assumes reinvestment of income and no transaction costs or taxes. The chart is for illustrative purposes only and is not indicative of any investment. Performance data shown represents past performance and is no guarantee of future results. Current performance may be higher or lower than the performance shown. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. To obtain the most current month-end performance data, visit us.dimensional.com.

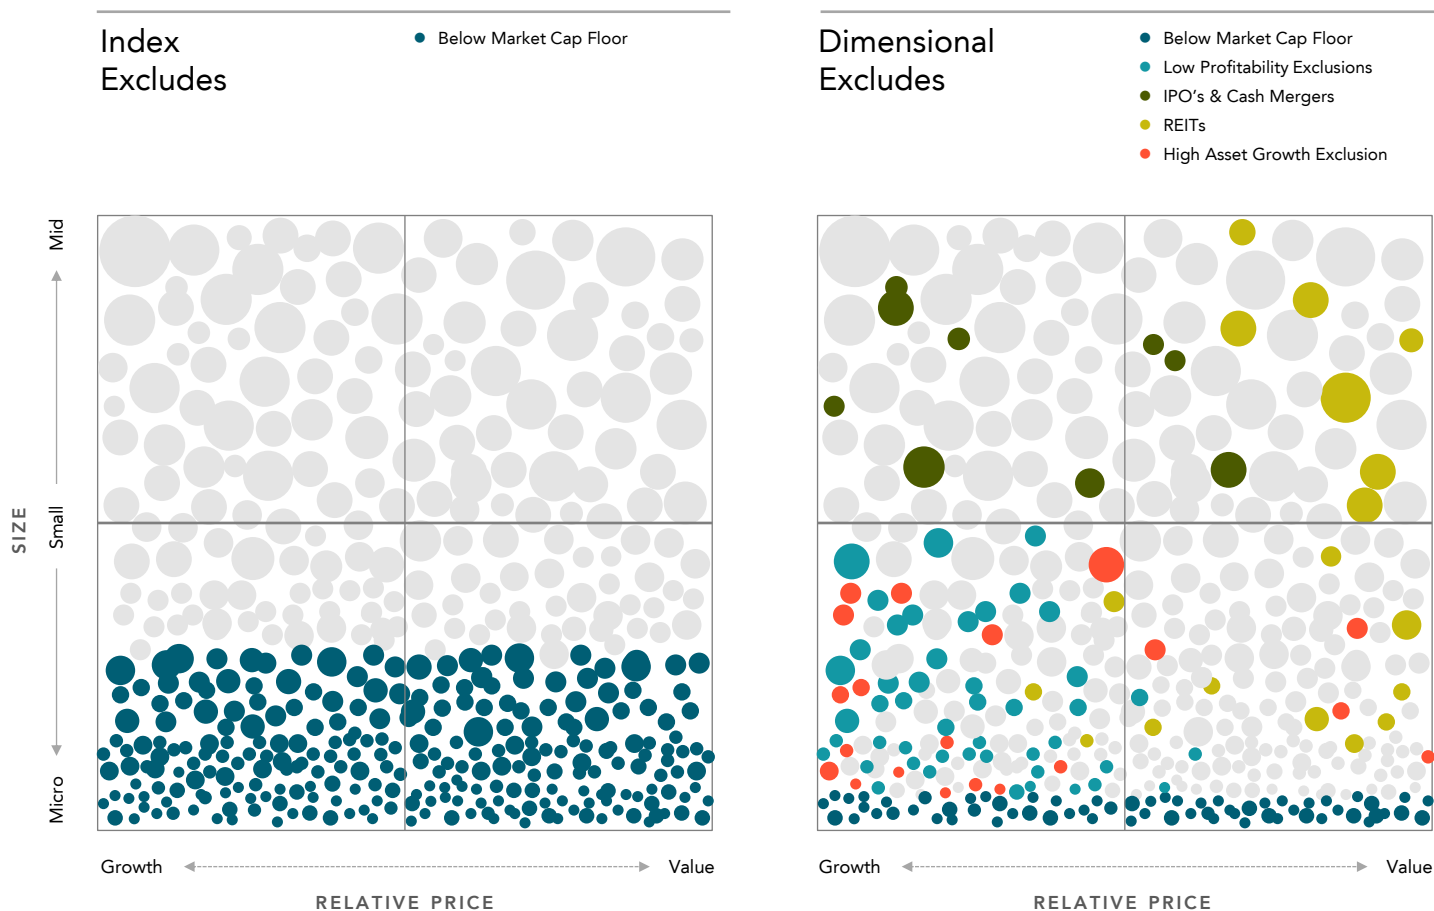

Returns for ETFs are based on NAV. Performance includes reinvestment of dividends and other earnings. Returns prior to share class inception are based on the performance of the Fund's oldest share class. US Micro Cap Portfolio inception 12/23/1981. Indices are not available for direct investment. See "Appendix: Standardized Performance Data and Disclosures" to learn how to obtain complete information on performance, investment objectives, risks, advisory fees, and expenses of Dimensional's funds. Frank Russell Company is the source and owner of the trademarks, service marks, and copyrights related to the Russell Indexes.

Implementation

Components of Net Returns

Refining Market Exposure

Dimensional has broader market capitalization coverage with targeted exclusions, such as for companies with lower expected returns and REITs.

For illustrative purposes only. Index exclusions shown are illustrative only and are meant to demonstrate how a broad market index may refine the total investable universe. Companies are plotted on market capitalization (vertical axis) and price-to-book (horizontal axis), and the size of the dots is proportional to companies' market capitalization. Profitability is measured as operating income before depreciation and amortization minus interest expense scaled by book. Low Profitability Exclusion refers to companies with the lowest profitability and highest price-to-book (growth). High Asset Growth Exclusion refers to companies with high asset growth.

Increasing Expected Returns in Small Caps

Annualized compound returns

	Small Cap Market	Small Growth Low Profitability Firms	Small High Asset Growth Firms	Small Cap Market ex Growth Low Profitability and High Asset Growth Firms	Increase in Small Cap Return from these Exclusions
US Market January 1975–December 2025	13.79%	6.74%	2.53%	14.99%	1.20%
Non-US Developed Markets January 1990–December 2025	6.27%	-1.36%	-2.46%	7.24%	0.98%
Emerging Markets January 1994–December 2025	6.01%	-3.42%	-2.88%	7.63%	1.62%

Past performance is no guarantee of future results. Actual returns may be lower.

In USD. Small cap market, small cap market ex growth low profitability firms, and small cap market ex growth low profitability and high asset growth firms represented by Dimensional indices. See "Appendix: Increasing Expected Returns in Small Caps" in the appendix for further information on which Dimensional index has been used to represent each region. The Dimensional Indices represent academic concepts that may be used in portfolio construction and are not available for direct investment or for use as a benchmark. Their performance does not reflect the expenses associated with the management of an actual portfolio. Index returns are not representative of actual portfolios and do not reflect costs and fees associated with an actual investment. Actual returns may be lower. See "Index Descriptions" in the appendix for descriptions of Dimensional index data.

Relative Performance of US Micro Caps in Excess of US Micro Growth Low Profitability

Annual returns, January 1975–December 2025

Annualized Return (%)	January 1975–December 2025
Dimensional US Micro Cap Index	15.17
Dimensional US Micro Cap Growth Low Profitability Index	6.98
Relative Performance of US Micro Cap Index	8.19

Past performance, including hypothetical performance, is not a guarantee of future results.

In USD. Relative annual performance shows the returns the Dimensional US Micro Cap Index, in excess of the Dimensional US Small Cap Growth Low Profitability Index (Micro Caps only). The Dimensional Indices represent academic concepts that may be used in portfolio construction and are not available for direct investment or for use as a benchmark. Their performance does not reflect the expenses associated with the management of an actual portfolio. Index returns are not representative of actual portfolios and do not reflect costs and fees associated with an actual investment. Actual returns may be lower. See "Index Descriptions: Dimensional US Micro Cap Index" in the appendix for descriptions of Dimensional index data.

REIT Exclusion Provides Asset Location Flexibility

Dimensional's equity portfolios generally exclude REITs which may improve overall tax outcomes

Actual returns may vary. Performance data shown represents past performance and is no guarantee of future results. Current performance may be higher or lower than the performance shown. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. To obtain performance data current to the most recent month-end, visit us.dimensional.com.

1. US REITs dividend-to-price ratio represented by the Dimensional US Real Estate ETF (DFAR). DFAR had 2% qualified dividend income in calendar year 2025 and was selected as Dimensional's only US real estate ETF with broad exposure across US REITs.

2. US Market excluding REITs dividend-to-price ratio represented by the Dimensional US Equity Market ETF (DFUS). DFUS had 100% qualified dividend income in calendar year 2025 and was selected as Dimensional's most market-like ETF with broad exposure across large caps, mid caps, small caps, and micro caps.

3. Estimated Tax Cost is calculated as the weighted average dividend-to-price multiplied by the applicable tax rate. Qualified dividend income (QDI) tax rate applied is 23.8%. Non-qualified dividend income for US REITs assumes an effective tax rate of 33.4%. This rate is calculated as the non-qualified dividend income (NQDI) ordinary income rate of 37%, with a 20% qualified business income deduction under section 199A, plus applicable net investment income tax of 3.8%. Assumes no capital gain distributions. Some portion of REIT non-qualified dividend income may not be eligible for reduced rates under Section 199A. Tax rates selected assume highest marginal tax rate in effect for ordinary income. Alternative minimum tax and/or any applicable state and local taxes may also apply.

© 2026 S&P Dow Jones Indices LLC, a division of S&P Global. All rights reserved. All rights reserved. All returns reflect the reinvestment of dividends and other earnings. See Appendix: Standardized Performance Data & Disclosures to learn how to obtain complete information on performance, investment objectives, risks, advisory fees, and expenses of Dimensional's funds.

IPO Exclusion

Annualized returns, January 1, 2016–December 31, 2025

Research shows that IPO stocks tend to underperform following the initial public offering¹.

IPOs added to the Russell 2000 Index have underperformed the index within the first-year post offering.

Past performance, including hypothetical performance, is no guarantee of future results.

1. Additional information on Dimensional's IPO research can be found here: <https://www.dimensional.com/insights/ipos-profiles-are-high-what-about-returns>.

In USD. Source: CSRP, Bloomberg and Russell. IPOs return is the annualized monthly returns of all IPOs added to the Russell 2000 Index through each security's one-year IPO anniversary date, based on the start of the first full month after the IPO date. There are a total of 593 IPOs in the sample. Russell 2000 Index ex IPOs is the annualized monthly return for all stocks in the Russell 2000, excluding the IPOs measured above. Groups of stocks and their returns are hypothetical, are not representative of indices, actual investments or actual strategies managed by Dimensional, and do not reflect costs and fees associated with an actual investment. Frank Russell company is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Indices are not available for direct investment; therefore, their performance does not reflect the expenses associated with the management of an actual portfolio.

Balancing Long and Short-Term Return Considerations

Delaying purchase of stocks exhibiting lower short-term expected returns

Securities Lending

Momentum

Reversal

For illustrative purposes only. Considerations may not be mutually exclusive and may also be applied to delay sale of securities. Securities lending consideration is only applied to small cap companies. Past performance is relative to the stocks sector and adjusted for earnings announcements.

Relative Price Advantages of Flexible Trading

Dimensional price advantage in equity trades vs. demanding immediacy¹ (bps), January 2021–December 2025

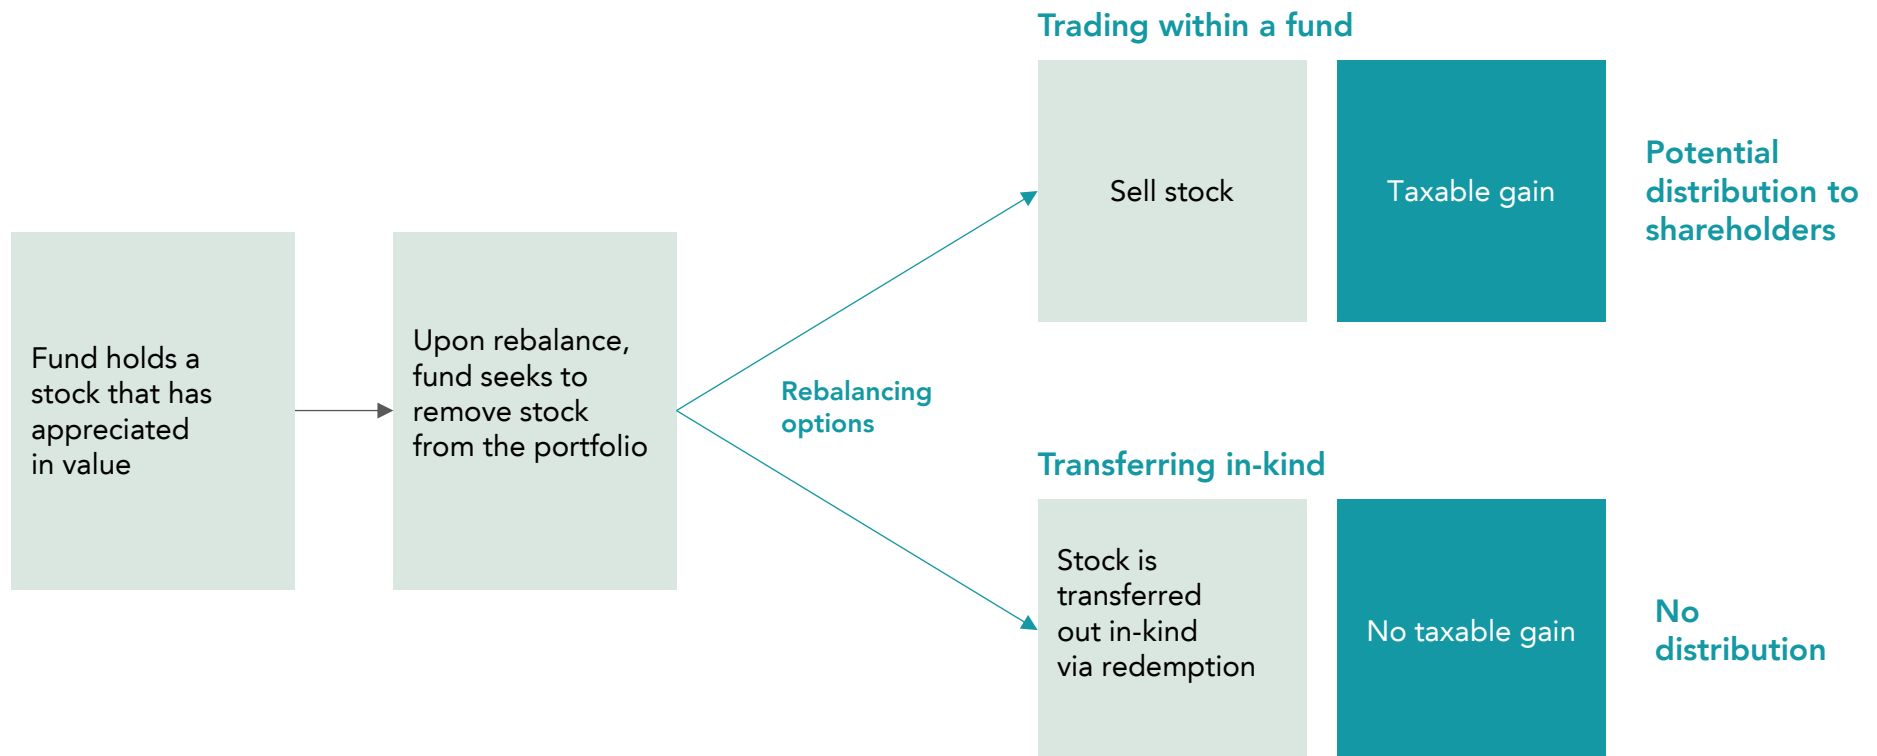

Past performance is no guarantee of future results.

1. Price advantages estimated relative to demanding immediacy, represented by an approach that sells at the bid and buys at the offer (SBBO).

Monthly average price advantages over SBBO in basis points (bps). Source: Dimensional. Small cap is defined as approximately the bottom 8% of market cap within the US, bottom 12.5% of market cap within each non-US developed market country, and bottom 15% of market cap within each emerging market country. Small cap stocks with the lowest profitability and lowest book-to-market ratios are excluded. For more information and a description of the methodology used, see Jerry Liu and Ryan J. Wiley, "Global Trading Price Advantages of Flexible Equity Portfolios," June 2021.

Tax-Efficient Rebalancing via In-Kind Mechanism

How the in-kind mechanism can help reduce taxable distributions to investors

Dimensional vs. the Industry

Percentage of US-domiciled equity funds that outperformed their benchmark as of March 31, 2026

Performance data shown represents past performance and is no guarantee of future results. The sample includes funds at the beginning of each respective period. Survivors are funds that had returns for every month in the sample period. Outperformers (winner funds) are funds that survived the sample period and whose cumulative net return over the period exceeded that of their respective benchmark. Each fund is evaluated relative to its respective Morningstar focus prospectus benchmark. Where the full series of Morningstar focus prospectus benchmark returns is unavailable, non-Dimensional funds are instead evaluated relative to their Morningstar category index. See "Dimensional vs. the Industry Appendix" for more information.

1. Dimensional fund data provided by the fund accountant. Dimensional funds or sub-advised funds whose access is or previously was limited to certain investors are excluded.

2. US-domiciled, USD-denominated open-end and exchange-traded fund data is provided by Morningstar.

Characteristics and Performance

Portfolio Overview

As of March 31, 2026

	Ticker	Inception Date	Fund Net Assets (\$ millions) ¹	Number of Companies	Gross Expense Ratio (bps) ²	Net Expense Ratio (bps) ²
US Micro Cap Portfolio	DFSCX	12/23/1981	6,841.6	1,704	42	41

1. Fund Net Assets in USD.

2. Fee and expense information as of the prospectus dated February 28, 2026. The Portfolio has entered into fee waiver and/or expense assumption arrangements with the advisor. In these cases, the advisor has contractually agreed, under certain circumstances, to waive certain fees and/or assume certain expenses of the class of the Portfolio. The fee waiver will remain in effect through February 28, 2027, and may only be terminated by the Portfolio's Board of Directors/Trustees prior to that date. The net expense ratio of the class reflects the gross expense ratio of such class of the Portfolio after taking into account any such fee waiver and/or expense assumption arrangements. The gross expense ratio reflects the Total Annual Fund Operating Expenses as disclosed in the prospectus. Please read the Portfolio's prospectus for details and more information. Holdings are subject to change.

Characteristics

As of March 31, 2026

	Ticker	Number of Companies	Weighted Average Market Cap (\$ millions)	Aggregate Price-to-Book	Weighted Average Profitability ¹

Implementation that Adds Value

Seeking to increase expected returns at every step of the process

Emphasize securities with higher expected returns	
Security Weighting	Overweight smaller market cap
	Overweight lower relative price
	Overweight higher profitability ¹
Security Selection	Small growth low profitability ¹ stocks excluded
	Small high asset growth stocks excluded
Incorporate additional information about expected returns into buy and sell decisions	
Momentum	Consider momentum expected return implications for both buy and sell orders
Reversals	Consider short-run reversals expected return implications for both buy and sell orders
Securities Lending ²	Delay purchase of small cap securities with a high borrowing fee in the securities lending market
Control Trading Costs	Economies of scale and efficient market access help control explicit costs
	Flexible trading helps control implicit costs
Maintain consistent focus on premiums	
Daily Rebalancing	Evaluate current holdings and cash balances daily
Meaningful Turnover	Rebalancing candidates meaningfully improve expected returns after anticipated costs
Increase the value of holdings in the fund	
Corporate Actions	Maximize the value of corporate action elections
Investment Stewardship	Advocate for investors to enhance shareholder value
Securities Lending ²	Lend securities to generate securities lending revenue

1. Profitability is a measure of current profitability based on information from individual companies' income statements.

2. Securities lending involves risk—including counterparty risk—and possible loss. Revenue is not guaranteed and will fluctuate.

Higher Expected Returns

Based on decades of empirical research, our strategies focus on three long-term drivers of higher expected return

DRIVERS

Company Size

Size premium:
Small vs. Large companies

Relative Price¹

Value premium:
Value vs. Growth companies

Profitability²

Profitability premium:
High Prof vs. Low Prof companies

AVERAGE MONTHLY RETURNS (%), 1963–2025

Expected Return Group

 Lower → Higher

US Large

		Profitability			Prof Premium
		Low		High	
Price/Book	Growth	0.85	1.08	1.00	0.15
		0.82	0.91	1.04	0.22
	Value	0.94	1.12	1.16	0.22
Value Premium		0.09	0.04	0.16	

US Small

		Profitability			Prof Premium
		Low		High	
Price/Book	Growth	0.43	0.88	1.05	0.62
		0.90	1.13	1.31	0.41
	Value	1.21	1.31	1.48	0.27
Value Premium		0.78	0.43	0.43	

Past performance is no guarantee of future results. Actual investment returns may be lower.

1. Relative price as measured by the price-to-book ratio; value stocks are those with lower price-to-book ratios.

2. Profitability is measured as operating income before depreciation and amortization minus interest expense scaled by book.

In USD. US Large and US Small computed from Fama/French Total US Market Research Index published security weights. Dimensional computed security returns and Dimensional classification of securities based on size, value, and profitability parameters. The Fama/French indices represent academic concepts that may be used in portfolio construction and are not available for direct investment or for use as a benchmark. Index returns are not representative of actual portfolios and do not reflect costs and fees associated with an actual investment. See Appendix "Higher Expected Returns: Descriptions and Important Information."

Many Inputs Inform How We Design and Manage Portfolios

Foundations of Portfolio Structure

Building blocks of asset allocation for Dimensional's equity strategies

Company Size

SIZE PREMIUM

Small vs. large companies

Relative Price¹

VALUE PREMIUM

Value vs. growth companies

Profitability²

PROFITABILITY PREMIUM

High vs. low profitability companies

1. Relative price as measured by the price-to-book ratio; value stocks are those with lower price-to-book ratios.

2. Profitability is a measure of current profitability, based on information from individual companies' income statements.

Designing Robust Portfolios

GOALS

Increase Expected Returns

Manage Risks

Control Costs

CONSIDERATIONS

- Sorting variables
- Breakpoint definitions
- Integration of premiums
- Weighting schema
- Degree of emphasis on premiums
- Diversification across names, sectors, and countries
- Level of turnover
- Liquidity and expected trading costs

There Is More to Managing Portfolios

While a strong buy and sell discipline is critical, we also put the stocks we hold to work for shareholders

Securities Lending

Generating income for portfolios and gathering information on expected returns

Investment Stewardship

Advocating for investors to enhance shareholder value

Corporate Actions

Maximizing the value of corporate action elections

Tax Efficiency Considerations

Dimensional uses a multifaceted approach to improve tax efficiency in equity funds

Income	<p>Use a daily implementation process to delay purchase or sales around dividends to increase qualified dividend income</p> <p>Exclude REITs from equity portfolios</p>
Short-Term Capital Gains	<p>Tax-advantaged lot selection methodology</p> <p>Delay realization of short-term capital gains through flexible implementation and low turnover portfolio design</p>
Long-Term Capital Gains	<p>Flexible daily implementation to delay realization of capital gains, using cash flows for efficient rebalancing</p> <p>In-kind redemption can allow for the fund to delay recognition of capital gains</p>

Evaluating Dimensional Across Strategies

Dimensional equity fund performance relative to Morningstar peers, 15-year period ending March 31, 2026

1. Average Index Fund Placement is provided where index fund(s) with a Morningstar 15-Year Total Return Absolute Category Rank exist in the category as of the period ending date. Dimensional placement is the Morningstar 15-Year Total Return Absolute Category Rank sourced from Morningstar. Number of funds starting the period is the number of share classes, within the respective Morningstar Category, with return histories as of the start of the 15-year period. The Morningstar category data is provided at the individual fund share class level. Multiple share classes of a fund typically have a common portfolio but impose different expense structures. The Average Index Fund Placement is the average, as determined by Dimensional, of the Morningstar 15-Year Total Return Absolute Category Rank for index funds within the respective Morningstar category. All funds are US-domiciled. Funds may have experienced negative performance over the time period. Past performance is no guarantee of future results. Visit dimensional.com for standardized performance information for Dimensional's funds. See "Relative Performance for Standardized Periods" in the appendix for further information.

Equity funds included on the “Evaluating Dimensional Across Strategies” slide are shown here in bold.

1. Dimensional Placement is the Morningstar 1-, 5-, 10-, or 15-Year Total Return Absolute Category Rank sourced from Morningstar. Number of funds starting the period is the number of share classes, within the respective Morningstar Category, with return histories as of the start of the 1-, 5-, 10-, or 15-year period.
2. Number of Ranked Investments is sourced from Morningstar for each category and is the number of share classes that were ranked as of the end of the 1-, 5-, 10-, or 15-year period.
3. Average Index Fund Placement is provided where index fund(s) with a Morningstar 1-, 5-, 10-, or 15-Year Total Return Absolute Category Rank exist in the category at the end of the period. The Average Index Fund Placement is the average, as determined by Dimensional, of the Morningstar 1-, 5-, 10-, or 15-Year Total Return Absolute Category Rank for index funds within the respective Morningstar category at the end of the period.
4. Prior to listing on June 14, 2021, the ETF operated as a mutual fund. The NAVs of the predecessor mutual fund are used for both NAV and market price performance from inception to listing.
5. Prior to listing on September 13, 2021, the ETF operated as a mutual fund. The NAVs of the predecessor mutual fund are used for both NAV and market price performance from inception to listing.
6. Prior to listing on May 9, 2022, the ETF operated as a mutual fund. The NAVs of the predecessor mutual fund are used for both NAV and market price performance from inception to listing.

The Morningstar category data is provided at the individual fund share class level. Multiple share classes of a fund typically have a common portfolio but impose different expense structures. The table includes US-domiciled Dimensional equity funds ranked by Morningstar and available on or before 15 years prior to the end of the period. Morningstar uses NAV performance data for ETFs. **Funds may have experienced negative performance over the time period. Past performance is no guarantee of future results. Visit dimensional.com for standardized performance information for Dimensional's funds.**

Index Descriptions

Dimensional US Micro Cap Index was created by Dimensional in March 2007 and is compiled by Dimensional. June 1927–December 1974: Market-capitalization-weighted index of securities of the smallest US companies whose market capitalization falls in the lowest 4% of the total market capitalization of the eligible market. The eligible market is composed of securities of US companies traded on the NYSE, NYSE MKT (formerly AMEX), and Nasdaq Global Market. Exclusions: Non-US companies, REITs, UITs, and Investment Companies. Source: CRSP and Compustat. January 1975–present: Market-capitalization-weighted index of securities of the smallest US companies whose market capitalization falls in the lowest 8% of the total market capitalization of the eligible market. The eligible market is composed of securities of US companies traded on the NYSE, NYSE MKT (formerly AMEX), and Nasdaq Global Market. Exclusions: Non-US companies, REITs, UITs, and Investment Companies and companies with the lowest profitability and highest relative price within the small cap universe. The index also excludes those companies with the highest asset growth within the small cap universe. Source: CRSP and Compustat. The index monthly returns are computed as the simple average of the monthly returns of 12 sub-indices, each one reconstituted once a year at the end of each month of the year. The calculation methodology for the index was amended in January 2014 to include profitability as a factor in selecting securities for inclusion in the index. The calculation methodology for the index was amended in December 2019 to include asset growth as a factor in selecting securities for inclusion in the index.

Dimensional US Small Cap Growth Low Profitability Index (Micro Caps only) was created in February 2016 and is compiled by Dimensional. January 1975–present: Consists of micro cap securities in the eligible markets with the lowest profitability and highest relative price within their country's small cap universe, after the exclusion of utilities and companies with either negative or missing relative price data. Micro cap securities are defined as the smallest US companies whose market capitalization falls in the lowest 4% of the total market capitalization of the Eligible Market. Profitability is defined as operating income before depreciation and amortization minus interest expense divided by book equity. The eligible market is composed of securities of US companies traded on the NYSE, NYSE MKT (formerly AMEX), and Nasdaq Global Market. Exclusions: Non-US companies, REITs, UITs, and Investment Companies. Source: CRSP and Compustat. The index monthly returns are computed as the simple average of the monthly returns of 12 sub-indices, each one reconstituted once a year at the end of each month of the year.

The Dimensional Indices have been retrospectively calculated by Dimensional Fund Advisors LP and did not exist prior to their index inception dates. Accordingly, results shown during the periods prior to each index's inception date do not represent actual returns of the index. Other periods selected may have different results, including losses. Backtested index performance is hypothetical and is provided for informational purposes only to indicate historical performance had the index been calculated over the relevant time periods. Backtested performance results assume the reinvestment of dividends and capital gains. Profitability is defined as operating income before depreciation and amortization minus interest expense divided by book equity. Asset growth is defined as change in total assets from the prior fiscal year to current fiscal year.

Where issued in the European Union (EU): The Indices reflected above are not "financial indices" for the purpose of the EU Markets in Financial Instruments Directive (MiFID). Rather, they represent academic concepts that may be relevant or informative about portfolio construction and are not available for direct investment or for use as a benchmark.

Index Descriptions

Dimensional US Small Cap Index was created by Dimensional in March 2007 and is compiled by Dimensional. June 1927–December 1974: Market-capitalization-weighted index of securities of the smallest US companies whose market capitalization falls in the lowest 8% of the total market capitalization of the eligible market. The eligible market is composed of securities of US companies traded on the NYSE, NYSE MKT (formerly AMEX), and Nasdaq Global Market. Exclusions: Non-US companies, REITs, UITs, and Investment Companies. Source: CRSP and Compustat. January 1975–present: Market-capitalization-weighted index of securities of the smallest US companies whose market capitalization falls in the lowest 8% of the total market capitalization of the eligible market. The eligible market is composed of securities of US companies traded on the NYSE, NYSE MKT (formerly AMEX), and Nasdaq Global Market. Exclusions: Non-US companies, REITs, UITs, and Investment Companies and companies with the lowest profitability and highest relative price within the small cap universe. The index also excludes those companies with the highest asset growth within the small cap universe. Source: CRSP and Compustat. The index monthly returns are computed as the simple average of the monthly returns of 12 sub-indices, each one reconstituted once a year at the end of each month of the year. The calculation methodology for the index was amended in January 2014 to include profitability as a factor in selecting securities for inclusion in the index. The calculation methodology for the index was amended in December 2019 to include asset growth as a factor in selecting securities for inclusion in the index.

Dimensional International Small Cap Index was created by Dimensional in April 2008 and is compiled by Dimensional. January 1970–June 1981: 50% Hoare Govett Small Companies Index (hgsmall.ind), 50% Nomura Small Companies Index (nomura.ind). July 1981–December 1989: Includes securities of MSCI EAFE countries in the bottom 10% of market capitalization, excluding the bottom 1%. All securities are market capitalization weighted. Each country is capped at 50%. Rebalanced semiannually. January 1990–present: Market-capitalization-weighted index of small company securities in the eligible markets, excluding those with the lowest profitability and highest relative price within their country's small cap universe. The index also excludes

those companies with the highest asset growth within their country's small cap universe. Maximum index weight of any one company is capped at 5%. Countries currently included are Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, and United Kingdom. Exclusions: REITs and Investment Companies. Source: Bloomberg. The index monthly returns are computed as the simple average of the monthly returns of four sub-indices, each one reconstituted once a year at the end of each quarter of the year. The calculation methodology for the index was amended in January 2014 to include profitability as a factor in selecting securities for inclusion in the index. The calculation methodology for the index was amended in November 2019 to include asset growth as a factor in selecting securities for inclusion in the index.

Dimensional Emerging Markets Small Index was created by Dimensional in April 2008 and is compiled by Dimensional. January 1989–December 1989: Fama/French Emerging Markets Small Cap Index. January 1990–present: Market-capitalization-weighted index of small company securities in the eligible markets, excluding those with the lowest profitability and highest relative price within their country's small cap universe. The index also excludes those companies with the highest asset growth within their country's small cap universe. Maximum index weight of any one company is capped at 5%. Countries currently included are Brazil, Chile, China, Colombia, the Czech Republic, Greece, Hungary, India, Indonesia, Kuwait, Malaysia, Mexico, Peru, the Philippines, Poland, Qatar, Saudi Arabia, South Africa, South Korea, Taiwan, Thailand, Turkey, and the UAE. Exclusions: REITs and Investment Companies. Source: Bloomberg. The index monthly returns are computed as the simple average of the monthly returns of four sub-indices, each one reconstituted once a year at the end of each quarter of the year. The calculation methodology for the index was amended in January 2014 to include profitability as a factor in selecting securities for inclusion in the index. The calculation methodology for the index was amended in November 2019 to include asset growth as a factor in selecting securities for inclusion in the index.

Fama/French International Value Index: July 1975–present: Consists of companies whose relative price is in the bottom 30% for the region. The index is reconstituted once a year at the end of December. Source: Ken French website. Simulated from MSCI and Bloomberg data.

Fama/French International Growth Index: July 1975–present: Consists of companies whose relative price is in the top 30% for the region. The index is reconstituted once a year at the end of December. Source: Ken French website. Simulated from MSCI and Bloomberg data.

Fama/French International High Profitability Index: July 1990–present: Courtesy of Fama/French from Bloomberg securities data. Includes stocks in the upper 30% operating profitability (OP) range in each region; companies weighted by float-adjusted market cap; rebalanced annually in June. OP for June of year t is annual revenues minus cost of goods sold, interest expense, and selling, general, and administrative expenses divided by book equity for the last fiscal year end in $t - 1$.

Fama/French International Low Profitability Index: July 1990–present: Courtesy of Fama/French from Bloomberg securities data. Includes stocks in the lower 30% operating profitability (OP) range in each region; companies weighted by float-adjusted market cap; rebalanced annually in June. OP for June of year t is annual revenues minus cost of goods sold, interest expense, and selling, general, and administrative expenses divided by book equity for the last fiscal year end in $t - 1$.

Results shown during periods prior to each index's inception date do not represent actual returns of the respective index. Other periods selected may have different results, including losses. Backtested index performance is hypothetical and is provided for informational purposes only to indicate historical performance had the index been calculated over the relevant time periods. Backtested performance results assume the reinvestment of dividends and capital gains. Eugene Fama and Ken French are members of the Board of Directors of the general partner of, and provide consulting services to, Dimensional Fund Advisors LP.

Where issued in the European Union (EU): The Indices reflected above are not "financial indices" for the purpose of the EU Markets in Financial Instruments Directive (MiFID). Rather, they represent academic concepts that may be relevant or informative about portfolio construction and are not available for direct investment or for use as a benchmark.

Index Descriptions

Dimensional US Unadjusted Small Cap Index was created by Dimensional in April 2019 and is compiled by Dimensional. June 1927–present: Market-capitalization-weighted index of securities of the smallest US companies whose market capitalization falls in the lowest 8% of the total market capitalization of the eligible market. The eligible market is composed of securities of US companies traded on the NYSE, NYSE MKT (formerly AMEX), and Nasdaq Global Market. Exclusions: non-US companies, REITs, UITs, and Investment Companies. Source: CRSP and Compustat. The index monthly returns are computed as the simple average of the monthly returns of 12 sub-indices, each one reconstituted once a year at the end of each month of the year.

Dimensional International Unadjusted Small Index was created by Dimensional in April 2019 and is compiled by Dimensional. January 1990–present: Market-capitalization-weighted index of small company securities in the eligible markets. Maximum index weight of any one company is capped at 5%. Countries currently included are Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Italy, Japan, Netherlands, New Zealand, Norway, Singapore, Spain, Sweden, Switzerland, and United Kingdom. Exclusions: REITs and Investment Companies. Source: Bloomberg. The index monthly returns are computed as the simple average of the monthly returns of four sub-indices, each one reconstituted once a year at the end of each quarter of the year.

Dimensional Emerging Markets Unadjusted Small Index was created by Dimensional in April 2019 and is compiled by Dimensional. January 1994–present: Market-capitalization-weighted index of small company securities in the eligible markets. Maximum index weight of any one company is capped at 5%. Countries currently included are Brazil, Chile, China, Columbia, the Czech Republic, Greece,

Hungary, India, Indonesia, Kuwait, Malaysia, Mexico, Peru, the Philippines, Poland, Qatar, Saudi Arabia, South Africa, South Korea, Taiwan, Thailand, Turkey, and the UAE. Exclusions: REITs and Investment Companies. Source: Bloomberg. The index monthly returns are computed as the simple average of the monthly returns of four sub-indices, each one reconstituted once a year at the end of each quarter of the year.

Dimensional UK Unadjusted Small Index was created by Dimensional in April 2019 and is compiled by Dimensional. January 1990–present: Market-capitalization-weighted index of small company securities in the eligible markets. Maximum index weight of any one company is capped at 10%. The country currently included is United Kingdom. Exclusions: REITs and Investment Companies. Source: Bloomberg, LSPD. The index monthly returns are computed as the simple average of the monthly returns of four sub-indices, each one reconstituted once a year at the end of each quarter of the year.

Dimensional Europe Unadjusted Small Index was created by Dimensional in April 2019 and is compiled by Dimensional. January 1990–present: Market-capitalization-weighted index of small company securities in the eligible markets. Maximum index weight of any one company is capped at 5%. Countries currently included are Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, Netherlands, Norway, Spain, Sweden, Switzerland, and United Kingdom. Exclusions: REITs and Investment Companies. Source: Bloomberg. The index monthly returns are computed as the simple average of the monthly returns of four sub-indices, each one reconstituted once a year at the end of each quarter of the year.

The Dimensional Indices have been retrospectively calculated by Dimensional Fund Advisors LP and did not exist prior to their index inception dates. Accordingly, results shown during the periods prior to each index’s inception date do not represent actual returns of the index. Other periods selected may have different results, including losses. Backtested index performance is hypothetical and is provided for informational purposes only to indicate historical performance had the index been calculated over the relevant time periods. Backtested performance results assume the reinvestment of dividends and capital gains. Profitability is defined as operating income before depreciation and amortization minus interest expense divided by book equity. Asset growth is defined as change in total assets from the prior fiscal year to current fiscal year.

Where issued in the European Union (EU): The Indices reflected above are not “financial indices” for the purpose of the EU Markets in Financial Instruments Directive (MiFID). Rather, they represent academic concepts that may be relevant or informative about portfolio construction and are not available for direct investment or for use as a benchmark.

Higher Expected Returns: Descriptions and Important Information

US Large and US Small: 1963–2025

Source: CRSP and Compustat. At the end of each June from 1963 to 2025, stocks are sorted on price-to-book into three portfolios, each representing one-third of the market. Similarly, stocks are sorted on profitability into three portfolios, each representing one-third of the market. Utilities are excluded. The monthly returns reported above are for the intersections of the three portfolios formed on price-to-book and the three portfolios formed on profitability.

Index Descriptions:

Fama/French Total US Market Research Index: July 1926–present: Fama/French Total US Market Research Factor + One-Month US Treasury Bills. Source: Ken French website. Fama/French and multifactor data provided by Fama/French.

Results shown during periods prior to each index's inception date do not represent actual returns of the respective index. Other periods selected may have different results, including losses. Backtested index performance is hypothetical and is provided for informational purposes only to indicate historical performance had the index been calculated over the relevant time periods. Backtested performance results assume the reinvestment of dividends and capital gains. Profitability is measured as operating income before depreciation and amortization minus interest expense scaled by book. Eugene Fama and Ken French are members of the Board of Directors of the general partner of, and provide consulting services to, Dimensional Fund Advisors LP.

Standardized Performance Data and Disclosures

Performance data shown represents past performance. Past performance is no guarantee of future results, and current performance may be higher or lower than the performance shown. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. To obtain performance data for Dimensional portfolios current to the most recent month-end, visit dimensional.com.

Consider the investment objectives, risks, and charges and expenses of the Dimensional funds carefully before investing. For this and other information about the Dimensional funds, please read the prospectus carefully before investing. Prospectuses are available by calling Dimensional Fund Advisors collect at (512) 306-7400 or at dimensional.com. Dimensional funds are distributed by DFA Securities LLC.

Dimensional Fund Advisors LP is an investment advisor registered with the Securities and Exchange Commission.

Disclosure regarding Dimensional ETFs:

ETFs trade like stocks, fluctuate in market value and may trade either at a premium or discount to their net asset value. ETF shares trade at market price and are not individually redeemable with the issuing fund, other than in large share amounts called creation units. ETFs are subject to risk similar to those of stocks, including those regarding short-selling and margin account maintenance. Brokerage commissions and expenses will reduce returns.

For ETFs, the market price return is calculated from closing prices as determined by the fund's listing exchange. If you trade your shares at another time, your return may differ.

Risks include loss of principal and fluctuating value. Investment value will fluctuate, and shares, when redeemed, may be worth more or less than original cost.

Small and micro cap securities are subject to greater volatility than those in other asset categories.

International and emerging markets investing involves special risks, such as currency fluctuation and political instability. Investing in emerging markets may accentuate these risks.

Sector-specific investments focus on a specific segment of the market, which can increase investment risks.

Fixed income securities are subject to increased loss of principal during periods of rising interest rates. Fixed income investments are subject to various other risks, including changes in credit quality, liquidity, prepayments, call risk, and other factors. Municipal securities are subject to the risks of adverse economic and regulatory changes in their issuing states.

Real estate investment risks include changes in real estate values and property taxes, interest rates, cash flow of underlying real estate assets, supply and demand, and the management skill and creditworthiness of the issuer.

Sustainability funds use environmental and social screens that may limit investment opportunities for the fund.

Commodities include increased risks, such as political, economic, and currency instability, and may not be appropriate for all investors. The portfolio may be more volatile than a diversified fund because the portfolio invests in a smaller number of issuers and commodity sectors.

The fund prospectuses contain more information about investment risks.

1. Performance information as of 3/31/26. After-tax returns are calculated using the highest individual federal income tax rate in effect and they do not reflect state and local taxes. After-tax returns depend on an investor's particular tax situation and may differ from those shown here.

2. Fee and expense information as of the prospectus dated 02/28/26. Unless otherwise noted, the Portfolio has entered into fee waiver and/or expense assumption arrangements with the advisor. In these cases, the advisor has contractually agreed, under certain circumstances, to waive certain fees and/or assume certain expenses of the class of the Portfolio. The fee waiver will remain in effect through February 28, 2027, and may only be terminated by the Portfolio's Board of Directors/Trustees prior to that date. The net expense ratio of the class reflects the gross expense ratio of such class of the Portfolio after taking into account any such fee waiver and/or expense assumption arrangements. The gross expense ratio reflects the Total Annual Fund Operating Expenses as disclosed in the prospectus. Please read the Portfolio's prospectus for details and more information.

3. The Advisor has agreed to permanently waive all or a portion of the Portfolio's management fee to the extent necessary to limit the total management fees paid to the Advisor by the Portfolio, including the fees the Portfolio pays to the Advisor indirectly through its investment in other funds managed by the Advisor (excluding investments in affiliated cash management vehicles).

Since inception returns are provided for portfolios with less than 10 years of performance.

1. Performance information as of 3/31/26. After-tax returns are calculated using the highest individual federal income tax rate in effect and they do not reflect state and local taxes. After-tax returns depend on an investor's particular tax situation and may differ from those shown here.

2. Fee and expense information as of the prospectus dated 02/28/26. Unless otherwise noted, the Portfolio has entered into fee waiver and/or expense assumption arrangements with the advisor. In these cases, the advisor has contractually agreed, under certain circumstances, to waive certain fees and/or assume certain expenses of the class of the Portfolio. The fee waiver will remain in effect through February 28, 2027, and may only be terminated by the Portfolio's Board of Directors/Trustees prior to that date. The net expense ratio of the class reflects the gross expense ratio of such class of the Portfolio after taking into account any such fee waiver and/or expense assumption arrangements. The gross expense ratio reflects the Total Annual Fund Operating Expenses as disclosed in the prospectus. Please read the Portfolio's prospectus for details and more information.

3. The Advisor has agreed to permanently waive all or a portion of the Portfolio's management fee to the extent necessary to limit the total management fees paid to the Advisor by the Portfolio, including the fees the Portfolio pays to the Advisor indirectly through its investment in other funds managed by the Advisor (excluding investments in affiliated cash management vehicles). In addition, the Portfolio has entered into fee waiver and/or expense assumption arrangements with the advisor. In these cases, the advisor has contractually agreed, under certain circumstances, to waive certain fees and/or assume certain expenses of the class of the Portfolio. The fee waiver will remain in effect through February 28, 2027, and may only be terminated by the Portfolio's Board of Directors/Trustees prior to that date. The net expense ratio of the class reflects the gross expense ratio of such class of the Portfolio after taking into account any such fee waiver and/or expense assumption arrangements. The gross expense ratio reflects the Total Annual Fund Operating Expenses as disclosed in the prospectus. Please read the Portfolio's prospectus for details and more information.

4. The Portfolio has not entered into fee waiver and/or expense assumption arrangements with the advisor.

Since inception returns are provided for portfolios with less than 10 years of performance.

1. Performance information as of 3/31/26. After-tax returns are calculated using the highest individual federal income tax rate in effect and they do not reflect state and local taxes. After-tax returns depend on an investor's particular tax situation and may differ from those shown here.

2. Fee and expense information as of the prospectus dated 02/28/26. Unless otherwise noted, the Portfolio has entered into fee waiver and/or expense assumption arrangements with the advisor. In these cases, the advisor has contractually agreed, under certain circumstances, to waive certain fees and/or assume certain expenses of the class of the Portfolio. The fee waiver will remain in effect through February 28, 2027, and may only be terminated by the Portfolio's Board of Directors/Trustees prior to that date. The net expense ratio of the class reflects the gross expense ratio of such class of the Portfolio after taking into account any such fee waiver and/or expense assumption arrangements. The gross expense ratio reflects the Total Annual Fund Operating Expenses as disclosed in the prospectus. Please read the Portfolio's prospectus for details and more information.

Since inception returns are provided for portfolios with less than 10 years of performance.

1. Performance information as of 3/31/26. After-tax returns are calculated using the highest individual federal income tax rate in effect and they do not reflect state and local taxes. After-tax returns depend on an investor's particular tax situation and may differ from those shown here.

2. Fee and expense information as of the prospectus dated 02/28/26. Unless otherwise noted, the Portfolio has entered into fee waiver and/or expense assumption arrangements with the advisor. In these cases, the advisor has contractually agreed, under certain circumstances, to waive certain fees and/or assume certain expenses of the class of the Portfolio. The fee waiver will remain in effect through February 28, 2027, and may only be terminated by the Portfolio's Board of Directors/Trustees prior to that date. The net expense ratio of the class reflects the gross expense ratio of such class of the Portfolio after taking into account any such fee waiver and/or expense assumption arrangements. The gross expense ratio reflects the Total Annual Fund Operating Expenses as disclosed in the prospectus. Please read the Portfolio's prospectus for details and more information.

3. Prior to listing date, the ETF operated as a mutual fund. The NAVs of the predecessor mutual fund are used for both NAV and market price performance from inception to listing.

4. The Portfolio has not entered into fee waiver and/or expense assumption arrangements with the advisor.
