Investment Philosophy

Dimensional Investing

“It’s 10% having a good idea and 90% implementing that idea and making it work. Dimensional has been making it work for decades.”

Robert Merton
Nobel laureate, 1997

Term Spreads and Expected Term Premiums

Using information in spreads to seek higher expected returns

NORMAL YIELD CURVE

- On average, wide term spreads are associated with higher term premiums.
 - Lengthen duration, target highest/steepest segments of yield curve.
- On average, narrow term spreads are associated with lower term premiums.
 - Shorten duration, target shorter maturities.

FLAT/INVERTED YIELD CURVE

Global Term Spreads and Expected Term Premiums

Expanding the opportunity set

DOMESTIC MARKET INVESTOR

GLOBAL, CURRENCY-HEDGED INVESTOR

- Reliable relationships exist between current term spreads and future term premiums globally.
- Global yield curves may exhibit different term spreads offering a broadened opportunity set.
- Since yields across countries do not move in lock-step, investors can reduce expected volatility by diversifying across many yield curves using global bonds.

Portfolio Implementation

Integrated Fixed Income Portfolio Management and Trading

Pursuing higher expected returns and cost-effective execution

1. Fee and expense information as of the prospectus dated 02/28/26. The Portfolio has entered into fee waiver and/or expense assumption arrangements with the advisor. In these cases, the advisor has contractually agreed, under certain circumstances, to waive certain fees and/or assume certain expenses of the class of the Portfolio. The fee waiver will remain in effect through February 28, 2027, and may only be terminated by the Portfolio's Board of Directors/Trustees prior to that date. The net expense ratio of the class reflects the gross expense ratio of such class of the Portfolio after taking into account any such fee waiver and/or expense assumption arrangements. The gross expense ratio reflects the Total Annual Fund Operating Expenses as disclosed in the prospectus. Please read the Portfolio's prospectus for details and more information.

Disclosure regarding Dimensional ETFs:

ETFs trade like stocks, fluctuate in market value and may trade either at a premium or discount to their net asset value. ETF shares trade at market price and are not individually redeemable with the issuing fund, other than in large share amounts called creation units. ETFs are subject to risk similar to those of stocks, including those regarding short-selling and margin account maintenance. Brokerage commissions and expenses will reduce returns.

For ETFs, the market price return is calculated from closing prices as determined by the fund's listing exchange. If you trade your shares at another time, your return may differ.

Risks include loss of principal and fluctuating value. Investment value will fluctuate, and shares, when redeemed, may be worth more or less than original cost.

Small and micro cap securities are subject to greater volatility than those in other asset categories.

International and emerging markets investing involves special risks, such as currency fluctuation and political instability. Investing in emerging markets may accentuate these risks.

Sector-specific investments focus on a specific segment of the market, which can increase investment risks.

Fixed income securities are subject to increased loss of principal during periods of rising interest rates. Fixed income investments are subject to various other risks, including changes in credit quality, liquidity, prepayments, call risk, and other factors. Municipal securities are subject to the risks of adverse economic and regulatory changes in their issuing states.

Real estate investment risks include changes in real estate values and property taxes, interest rates, cash flow of underlying real estate assets, supply and demand, and the management skill and creditworthiness of the issuer.

Sustainability funds use environmental and social screens that may limit investment opportunities for the fund.

Commodities include increased risks, such as political, economic, and currency instability, and may not be appropriate for all investors. The portfolio may be more volatile than a diversified fund because the portfolio invests in a smaller number of issuers and commodity sectors.

The fund prospectuses contain more information about investment risks.

1. Performance information as of 3/31/26. After-tax returns are calculated using the highest individual federal income tax rate in effect and they do not reflect state and local taxes. After-tax returns depend on an investor's particular tax situation and may differ from those shown here.

2. Fee and expense information as of the prospectus dated 02/28/26. Unless otherwise noted, the Portfolio has entered into fee waiver and/or expense assumption arrangements with the advisor. In these cases, the advisor has contractually agreed, under certain circumstances, to waive certain fees and/or assume certain expenses of the Portfolio. The fee waiver will remain in effect through February 28, 2027, and may only be terminated by the Portfolio's Board of Directors/Trustees prior to that date. The net expense ratio reflects the gross expense ratio of the Portfolio after taking into account any such fee waiver and/or expense assumption arrangements. The gross expense ratio reflects the Total Annual Fund Operating Expenses as disclosed in the prospectus. Please read the Portfolio's prospectus for details and more information.

3. The Portfolio has not entered into fee waiver and/or expense assumption arrangements with the advisor.
