

Market Returns through a Century of Recessions

What does a century of economic cycles teach investors about investing? Our interactive exhibit examines how stocks have behaved during US economic downturns. Markets around the world have often rewarded investors even when economic activity has slowed. This is an important lesson on the forward-looking nature of markets, highlighting how current market prices reflect market participants' collective expectations for the future.

Shaded periods below represent recessions.

1981-1982

Historically high interest rates preceded a harsh recession that dragged on for 16 months and saw unemployment peak at 10.4%. The stock market experienced a 15.9% slide before beginning a long rally.

RECESSION					MARKET DOWNTURN	
Duration (Months)	Industrial Production	Inflation	Max Unemployment	Change in GDP	Duration (Months)	Return from Peak
16	-8.3%	7.2%	10.4%	-2.5%	14	-15.9%

Gulf War

Stocks reacted negatively to the onset of the Gulf War in August 1990, dropping 17% over five months as the price of oil doubled. When the market regained its footing, stocks were set to start a nine-year bull market that peaked in the dot-com era.

RECESSION					MARKET DOWNTURN

Global Financial Crisis

During the Global Financial Crisis, the worst of the 50.4% stock market dive happened in the latter half of an 18-month recession that saw unemployment hit 9.4% and industrial production tumble 17%. But after falling for 16 months, the market started a nearly 11-year bull run.

RECESSION					MARKET DOWNTURN	
Duration (Months)	Industrial Production	Inflation	Max Unemployment	Change in GDP	Duration (Months)	Return from Peak
18	-17.0%	1.8%	9.4%	-4.0%	16	-50.4%

Peak represents month-end stock market peak prior to market downturn associated with recession. Past performance is no guarantee of future results.

COVID-19

The shortest recession in the past 100 years—and the deepest decline in GDP (–8.9%) since World War II—occurred in early 2020. The US stock market tumbled more than 20% as investors priced in the effects of the pandemic. But stocks made a sharp rebound and recorded a 24.1% gain for the year.

RECESSION					MARKET DOWNTURN

NOTES AND DATA SOURCES

- In US dollars. Stock returns represented by Fama/French Total US Market Research Index, provided by Ken French and available at mba.tuck.dartmouth.edu/pages/faculty/ken.french/data_library.html. This value-weighted US market index is constructed every month, using all issues listed on the NYSE, AMEX, or Nasdaq with available outstanding shares and valid prices for that month and the month before. Exclusions: American depositary receipts. Sources: CRSP for value-weighted US market return. Rebalancing: Monthly. Dividends: Reinvested in the paying company until the portfolio is rebalanced.
- Growth of wealth shows the growth of a hypothetical investment of \$100 in the securities in the Fama/French US Total Market Research Index from July 1926 through December 2022.
- Gross Domestic Product (GDP) based on quarterly data from the US Bureau of Economic Analysis; quarterly data not available prior to 1947. Percentage change in GDP based on business cycle peak to trough quarter as reported by National Bureau of Economic Research (NBER).
- Industrial Production, Inflation, and Unemployment based on monthly data from Federal Reserve Bank of St. Louis (FRED); Unemployment data not reported prior to 1929.
- All calculations are cumulative.

Data presented in the Growth of Wealth chart is hypothetical and assumes reinvestment of income and no transaction costs or taxes. The chart is for illustrative purposes only and is not indicative of any investment.

Indices are not available for direct investment. Their performance does not reflect the expenses associated with the management of an actual portfolio.

The Fama/French Indices represent academic concepts that may be used in portfolio construction and are not available for direct investment or for use as a benchmark. Results shown during periods prior to each index's index inception date do not represent actual returns of the respective index. Other periods selected may have different results, including losses. Backtested index performance is hypothetical and is provided for informational purposes only to indicate historical performance had the index been calculated over the relevant time periods. Backtested performance results assume the reinvestment of dividends and capital gains.
