
DIMENSIONAL WEALTH MODELS (EU)

Systematic Investment Solutions Powered by Financial Science

Dimensional's Wealth Models embody four decades of expertise in applying the great ideas in finance to global portfolio construction. The models offer a research-driven, systematic framework for pursuing a wide range of investment goals.

► **Systematic and transparent approach**

The models are guided by one investment philosophy and a proven implementation process applied consistently across all Dimensional funds.

► **Powered by financial science**

Dimensional is a pioneer in applying academic research to factor-based investing. The models integrate our most advanced thinking on the integration of financial theory, research and implementation.

► **Targeting higher expected returns**

The allocations use Dimensional funds designed to go beyond indexing by pursuing higher expected returns in a diversified, cost-effective manner.

Wealth Models designed to fit a variety of investment goals

Dimensional Wealth Models are designed for total portfolio emphasis on research-backed drivers of higher expected returns across equity markets (size, value and profitability) and fixed income markets (term, credit and currency).

1. Further details regarding a fund's sustainability considerations can be found in the relevant prospectus.

Built upon a systematic approach to portfolio design

Dimensional Wealth Models are based on decades of academic research and our experience in portfolio design and practical implementation. Our approach to model construction involves these steps:

1 Start with the market

We start with global equity and fixed income markets, which represent a broad and diverse universe of securities from which to assemble a marketwide portfolio.

2 Target higher expected returns

We tilt toward securities with higher expected returns. The equity allocations focus on size, value and profitability considerations. The fixed income allocations look to term, credit and currency where applicable.

3 Sustainability considerations

We adjust the core model for sustainability considerations to create an additional model set.

All Dimensional funds used in the models are broadly diversified and designed to pursue higher expected returns while managing risks and costs.

Offering a broad range of asset allocations

Within each model set, investors can choose from six equity/fixed income allocations designed to address their specific investment goals and risk preferences. The higher equity allocations are intended for investors focusing on growth of wealth; the higher fixed income allocations emphasise volatility reduction and preservation of purchasing power.

Portfolio allocations range from 100% fixed income to 100% equity, in increments of 20%.

For illustrative purposes only. The risk and expected return shown in this illustration are not reliable indicators of the funds' actual or future risk profiles. There is no guarantee strategies will be successful.

Harnessing the strength of Dimensional Investing

► Focused on investor goals

Each model set offers a thoughtful, research-based framework for pursuing long-term investment goals in a robust and transparent manner.

► One philosophy and approach

Dimensional has a deep belief in the power of markets and uses information embedded in market prices throughout its investment process. The models offer an efficient avenue to apply this belief system and investment approach.

► Informed by financial science

The models reflect basic principles of asset allocation theory and seek to add value through efficient implementation that combines the benefits of indexing (broad diversification and low cost) with those of systematic active investing (pursuit of higher expected returns, robust portfolio management and flexible trading). The underlying funds reflect portfolio enhancements arising from our latest advancements in research and implementation.

► Offering a consistent, transparent framework

Some industry models may include multiple funds with an inconsistent mix of investment objectives, characteristics and expected outcomes. We believe that our Wealth Models can offer a higher degree of confidence to financial advisers and individual investors when making asset allocation decisions.

► Targeting higher expected returns

Across both equities and fixed income, the model allocations emphasise reliable drivers of higher expected returns and integrate useful information about interactions among premiums. In contrast, many other models either may not target sources of higher expected returns or may target them separately.

Glossary

Factor-based investing: Refers to investment strategies constructed by sorting companies on quantitative variables to identify securities with higher expected returns.

Size premium or small cap premium: The return difference between small capitalisation stocks and large capitalisation stocks.

Value premium: The return difference between stocks with low relative prices (value) and stocks with high relative prices (growth).

Profitability premium: The return difference between stocks of companies with high profitability and those with low profitability.

Term premium: The return difference between bonds with different maturities but similar credit quality.

Credit premium: The return difference between bonds of similar maturity but different credit quality.

Currency of issuance: The currency in which an asset is issued, such as a USD- vs. euro-denominated bond.

Profitability: Profitability is defined as operating income before depreciation and amortisation minus interest expense divided by book equity.

PHILOSOPHY

Dimensional⁴ is a global investment manager dedicated to implementing the great ideas in finance.

We have a long history of applying academic research to practical investing. Today, we offer a full suite of equity and fixed income strategies designed to target higher expected returns.

Dimensional's investment approach is grounded in economic theory and backed by decades of research. By integrating our investment process with a flexible trading strategy, we work to manage the tradeoffs that arise when implementing portfolios. We consistently apply this process in all of our global and regional equity and fixed income strategies, with an aim to add value beyond what traditional managers and benchmarks can achieve.

We regard the assets we manage as more than just shares in a portfolio. The money represents the savings, sacrifice and dreams that investors have entrusted to us. We take this responsibility seriously.

Dimensional is headquartered in Austin, Texas, and has trading offices across North America, Europe and Asia, which enables us to cover global markets and manage strategies continuously.

3. Firmwide assets under management in USD (billions), number of employees, and offices as at 31 December 2023.

DIMENSIONAL WEALTH MODELS

The Dimensional Wealth Models are provided for informational, illustrative and educational purposes only. The Dimensional Wealth Models are intended only for use by a third party financial adviser, wealth manager, private bank, or other duly regulated financial intermediary (each a "Professional Adviser").

The Dimensional Wealth Models are intended for use only by such Professional Adviser as a resource in the development of advice or other investment services from such Professional Adviser to its own clients. The Dimensional Wealth Models shall not be the sole or primary basis for such Professional Adviser's recommendation and/or decision. Professional Advisers are responsible for making their own independent judgment as to how to use the Dimensional Wealth Models and/or whether to recommend or otherwise implement any trades or strategies for their clients.

By providing the Dimensional Wealth Models, Dimensional Ireland and Dimensional UK, as applicable (each an "Issuing Entity", as the context requires), does not provide any investment service to recipients of the Dimensional Wealth Models, and the Issuing Entity does not agree to provide recipients with the protections afforded to the clients of the Issuing Entity's investment services. The Dimensional Wealth Models are not, and must not be treated as, investment advice, a personal recommendation, investment research, or an investment recommendation by the Issuing Entity.

Investment opportunities discussed or referenced in the Dimensional Wealth Models may not be suitable for all investors, and potential investors must make an independent assessment of the appropriateness of any transaction in light of their own objectives and circumstances, including the possible risk and benefits of entering into such a transaction. Recipients of the Dimensional Wealth Models must not take (or refrain from taking) any investment decision based on the information set out in the Dimensional Wealth Models.

Before making any investment decision, potential investors should seek independent investment, legal, tax, accounting or other professional advice as appropriate, none of which is offered to recipients of the Dimensional Wealth Models by the Issuing Entity. Any recipient who is in any doubt about the investments to which the Dimensional Wealth Models relates should seek advice from a Professional Adviser who specialises in advising on this kind of investment. The Issuing Entity is not responsible for determining the appropriateness or suitability of the Dimensional Wealth Models or any of the investments underlying the Dimensional Wealth Models for any client of a Professional Adviser.

Although the information in the Dimensional Wealth Models is believed to be materially correct, no representation or warranty is given as to the accuracy of any of the information provided. Certain information included in the Dimensional Wealth Models is based on information obtained from sources considered to be reliable. However, any projections or analysis provided to assist the recipient of the Dimensional Wealth Models in evaluating the matters described in the Dimensional Wealth Models may be based on subjective assessments and assumptions and may use one among alternative methodologies that produce different results. Accordingly, any projections or analysis should not be viewed as factual and should not be relied upon as an accurate prediction of future results. The Issuing Entity makes no representation or warranty, express or implied (except as required by law or regulation) regarding the accuracy, completeness or adequacy of the information.

The Issuing Entity has a potential conflict of interest when it establishes the target asset classes, asset allocation objectives or ongoing allocations for the Dimensional Wealth Models, because it will allocate only to asset classes where Dimensional funds are available. The Issuing Entity acts as investment manager, sub-investment manager or investment adviser to the Dimensional funds comprising the Dimensional Wealth Models and is entitled to receive a fee from (or in respect of) each Dimensional funds, as reflected in the prospectus for the Dimensional funds.

The Issuing Entity does not accept any responsibility or liability whatsoever caused by any action taken in reliance upon the Dimensional Wealth Models. Furthermore, to the extent permitted by law, neither the Issuing Entity nor its employees, directors, officers, shareholders or service providers assumes any liability or responsibility nor owes any duty of care for any consequences of any person acting or refraining to act in reliance on the information contained in the Dimensional Wealth Models or for any decision based on it.
