Regarding Competitively Priced statement: Comparison against funds in its Morningstar peer category as of July 1, 2025.

Performance data shown represents past performance and is no guarantee of future results. Current performance may be higher or lower than the performance shown. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. To obtain the most recent month-end performance data, visit www.dimensionalfund.com. Performance includes reinvestment of dividends and other earnings. Returns for periods shorter than one year are not annualized. For ETFs, the market price return is calculated from closing prices as determined by the fund's listing exchange.

After-tax returns are calculated using the highest individual federal income tax rate in effect and they do not reflect state and local taxes. After-tax returns depend on an investor's particular tax situation and may differ from those shown here.

Prior to listing date, the ETF operated as a mutual fund. The NAVs of the predecessor mutual fund are used for both NAV and market price performance from inception to listing. For ETFs, the market price return is calculated from closing prices as determined by the fund's listing exchange. If you trade your shares at another time, your return may differ.
