

Dimensional ETFs: *Go beyond indexing*

Dimensional's active transparent exchange traded funds (ETFs) are built on four decades of expertise applying financial science to investment solutions. They offer the diversification and transparency of index investing. But they go beyond that, targeting higher expected returns daily through systematic yet flexible implementation.

Higher Expected Returns

Market prices contain reliable information that can be used to position portfolios toward outperformance.

Flexible Implementation

Daily flexibility allows us to consistently focus on higher expected returns, manage risks, and trade efficiently.

Competitively Priced¹

All Dimensional ETFs are priced within the lowest quartile among Morningstar category peers.

MARKETWIDE EQUITY

Marketwide equity strategies are designed to provide exposure to a broad market universe, generally covering all market capitalizations. They are total market solutions intended to increase expected returns and are efficiently managed to help reduce costs and tax impact. The strategies offer varying degrees of deviation from market cap weights toward higher-expected-return securities (smaller market caps, lower relative prices, higher profitability²), allowing investors to choose a core allocation that can meet their preferences between expected returns and tracking error.

As of March 31, 2025.

1. Comparison against funds in Morningstar peer categories as of March 31, 2025.

2. Profitability is defined as a company's operating income before depreciation and amortization minus interest expense scaled by book equity.

3. Fee and expense information as of the prospectus dated 02/28/25. Unless otherwise noted, the Portfolio has entered into fee waiver and/or expense assumption arrangements with the advisor. In these cases, the advisor has contractually agreed, under certain circumstances, to waive certain fees and/or assume certain expenses of the Portfolio. The fee waiver will remain in effect through February 28, 2026, and may only be terminated by the Portfolio's Board of Directors/Trustees prior to that date. The net expense ratio reflects the total annual fund operating expenses of the Portfolio after taking into account any such fee waiver and/or expense assumption arrangements. The gross expense ratio reflects the Total Annual Fund Operating Expenses as disclosed in the prospectus. Please read the Portfolio's prospectus for details and more information.

4. The Portfolio is subject to a unified management fee structure, pursuant to which the Advisor is responsible for substantially all ordinary operating expenses of the Portfolio. See the Portfolio's prospectus for more information.

COMPONENT EQUITY

Component equity strategies are designed to provide exposure to a particular segment of the market, such as small cap stocks or value stocks. They are intended to maintain consistent asset class exposure and efficiently focus on securities with higher expected returns. These strategies can serve as building blocks for various asset allocation objectives and be paired with marketwide strategies to further emphasize desired market segments.

In these cases, the advisor has contractually agreed, under certain circumstances, to waive certain fees and/or assume certain expenses of the Portfolio. The fee waiver will remain in effect through February 28, 2026, and may only be terminated by the Portfolio's Board of Directors/Trustees prior to that date. The net expense ratio reflects the total annual fund operating expenses of the Portfolio after taking into account any such fee waiver and/or expense assumption arrangements. The gross expense ratio reflects the Total Annual Fund Operating Expenses as disclosed in the prospectus. Please read the Portfolio's prospectus for details and more information.
4. Prior to listing date, the ETF operated as a mutual fund. The NAVs of the predecessor mutual fund are used for both NAV and market price performance from inception to listing.
5. The Portfolio has not entered into fee waiver and/or expense assumption arrangements with the advisor.

Prior to September 13, 2024, the US Equity Market ETF was the US Equity ETF.

Performance data shown represents past performance and is no guarantee of future results. Current performance may be higher or lower than the performance shown. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed may be worth more or less than their original cost. To obtain the most current month-end performance data, visit dimensional.com. Performance includes reinvestment of dividends and other earnings.

GLOSSARY

- Marketwide Equity Strategy:** a strategy designed to provide exposure to a broad market universe, generally covering all market capitalizations.
- Component Equity Strategy:** a strategy designed to provide exposure to a particular segment of the market, such as small cap stocks or value stocks.
- Market Capitalization:** the total market value of a company's outstanding shares, computed as price times shares outstanding.
- Weighted Average Market Capitalization:** the weight of each company's position in the overall portfolio multiplied by that company's market capitalization, which is then averaged across all holdings in the portfolio.
- Aggregate Price-to-Book:** the ratio of a firm's market value to its book value, where market value is computed as price multiplied by shares outstanding and book value is the value of stockholder equity as reported on a company's balance sheet.
- Weighted Average Profitability:** A company's operating income before depreciation and amortization minus interest expense scaled by book equity.

DISCLOSURES

For ETFs, the market price return is calculated from closing prices as determined by the fund's listing exchange. If you trade your shares at another time, your return may differ. ETFs trade like stocks, fluctuate in market value and may trade either at a premium or discount to their net asset value (NAV). ETF shares trade at market price and are not individually redeemable with the issuing fund, other than in large share amounts called creation units. ETFs are subject to risk similar to those of stocks, including those regarding short-selling and margin account maintenance. Brokerage commissions and expenses will reduce returns.

Risks include loss of principal and fluctuating value. Investment value will fluctuate, and shares, when redeemed, may be worth more or less than original cost. **Small and micro cap securities** are subject to greater volatility than those in other asset categories. **Value investing** is subject to risk which may cause underperformance compared to other equity investment strategies. **International and emerging markets investing** involves special risks, such as currency fluctuation and political instability. Investing in emerging markets may accentuate these risks. **Real estate investment** risks include changes in real estate values and property taxes, interest rates, cash flow of underlying real estate assets, supply and demand, and the management skill and creditworthiness of the issuer. **Fixed income securities** are subject to increased loss of principal during periods of rising interest rates. Fixed income investments are subject to various other risks, including changes in credit quality, liquidity, prepayments, call risk, and other factors. **Municipal securities** are subject to the risks of adverse economic and regulatory changes in their issuing states. The fund prospectuses contain more information about investment risks.
